TOXICOLOGY

# Volume Contents

## Volume 99 (1995)

Genotoxic and non-genotoxic activities of 2,4- and 2,6-diaminotoluene, as evaluated in Fischer-344 rat liver (**DNA adduct formation and preneoplastic foci show a carcinogenic potential only for the 2,4-isomer**)
M. Taningher, M. Peluso, S. Parodi, G.M. Ledda-Columbano, A. Columbano (Genova, Cagliari, Italy) ..... 1–10

Influence of antioxidants on cadmium toxicity of mouse preimplantation embryos in vitro (**Developmental toxicity of Cd may be mediated through oxidative damage and modulated by antioxidants**)
J.M. Peters, J.R. Duncan, L.M. Wiley, C.L. Keen (Davis, CA; Grahamstown, South Africa) ... 11–18

Relationship between cadmium-induced expression of heatshock genes, inhibition of protein synthesis and cell death (**Cadmium induces heat shock proteins differentially and dose-dependently**)
J.H. Ovelgönne, J.E.M. Souren, F.A.C. Wiegant, R. Van Wijk (Utrecht, The Netherlands) ..... 19–30

Toxicity of the novel animal-derived anticancer agent, VRCTC-310: acute and subchronic studies in beagle dogs (**The main feature of toxicity was myotoxicity at the injection site**)
L.J. DeTolla, K.C. Stump, R. Russell, L.J. Viskatis, J.G. Vidal, R.A. Newman, M.A. Etcheverry (Baltimore, MD; Cambridge, MA; Houston, TX) ..... 31–46

Potency of mixtures of polychlorinated biphenyls as inducers of dioxin receptor-regulated CYP1A activity in rat hepatocytes and H4IIE cells (**Co-administration of individual PCBs results in additive and in some cases synergistic effectiveness**)
H.-J. Schmitz, A. Hagenmaier, H.-P. Hagenmaier, K.W. Bock, D. Schrenk (Tübingen, Germany) 47–54

Lead acetate-induced contraction in rabbit mesenteric artery: Interaction with calcium and protein kinase C (**Lead appears to interact with PKC in an endothelium-independent, CA-dependent manner to cause vascular smooth muscle contraction**)
S.W. Watts, S. Chai, R.C. Webb (Ann Arbor, MI) ..... 55–65

The role of G-proteins in the activation of human leukocytes by particulate stimuli to produce reactive oxygen metabolites (**It is suggested that a cholera toxin-sensitive G-protein may be involved in this process**)
M. Ruotsalainen, K.M. Savolainen (Kuopio, Finland) ..... 67–76

On the effects of paraquat on isolated mitochondria. Evidence that paraquat causes opening of the cyclosporin A-sensitive permeability transition pore synergistically with nitric oxide (**Paraquat facilitates the opening of the calcium-dependent permeability transition pore**)
P. Costantini, V. Petronilli, R. Colonna, P. Bernardi (Padova, Italy) ..... 77–88

Secondary nitroalkanes: Induction of DNA repair in rat hepatocytes, activation by aryl sulfotransferase and hepatocarcinogenicity of 2-nitrobutane and 3-nitropentane in male F344 rats (**Secondary nitroalkanes constitute a hitherto unrecognized class of chemical carcinogens**)
E.S. Fiala, R.S. Sodum, N.S. Hussain, A. Rivenson, L. Dolan (Valhalla, NY) ..... 89–97

Depletion of neutrophils and modulation of Kupffer cell function in allyl alcohol-induced hepatotoxicity (**Kupffer cells or neutrophils do not appear to play a role in allyl alcohol induced hepatotoxicity**)
P.E. Ganey, A.E. Schultze (East Lansing, MI) ..... 99–106

FD&C Red No.105 (Rose Bengal B) neutralizes the thyroid tumor promoting effect of iodine-deficient diet in rats (**FR105 was an efficient iodide source**)
J. Kanno, Y. Goda, K. Sato, K. Yoshihira, Y. Hayashi (Tokyo, Japan) ..... 107–113

0300-483X/95/$09.50 © 1995 Elsevier Science Ireland Ltd. All rights reserved

Involvement of reactive oxygen species in aflatoxin $B_1$-induced cell injury in cultured rat hepatocytes **(Lipid peroxidation seems to be a cellular mechanism of aflatoxin action)**
H.-M. Shen, C.-N. Ong, C.-Y. Shi (Singapore, Singapore) ..... 115–123
Effect of 25-hydroxycholesterol, 26-hydroxycholesterol and its analogue, 26-aminocholesterol, on protein content, protein synthesis and LDH leakage in mouse epidermal cells **(The amino analogue is cytotoxic while the hydroxycholesterols are even possibly protective)**
M. Marinovich, M. Guizzetti, F. Ghilardi, R. Paoletti, C.L. Galli (Milano, Italy) ..... 125–134

**Immunotoxicology**
Immunotoxicity of aminocarb. III. Exposure route-dependent immunomodulation by aminocarb in mice **(Aminocarb was found to be non or weakly immunosuppressive in mice according to the route of exposure)**
J. Bernier, D. Girard, K. Krzystyniak, G. Chevalier, B. Trottier, D. Nadeau, M. Rola-Pleszczynski, M. Fournier (Sherbrooke, Canada) ..... 135–146

Polybrominated biphenyl induction of cytochrome P450 mixed function oxidase activity in primary rat and human hepatocytes **(Human hepatocytes have a higher threshold for the induction of 7-ethoxycoumarin-*O*-deethylase than have rat hepatocytes)**
J.C. Merrill, D.J. Beck, D.A. Kaminski, A.P. Li (St. Louis, MO) ..... 147–152
Biological effects of diesel exhaust particles (DEP). II. Acute toxicity of DEP introduced into lung by intratracheal instillation **(Following instillation of diesel exhaust particles, early signs of damage are found in type I epithelial and capillary endothelial cells)**
T. Ichinose, A. Furuyama, M. Sagai (Ibaraki, Japan) ..... 153–167
Characterization of hepatic responses of rat to administration of perfluorooctanoic and perfluorodecanoic acids at low levels **(Perfluorodecanoic acid is more hepatotoxic than perfluorooctanoic acid)**
Y. Kawashima, H. Kobayashi, H. Miura, H. Kozuka (Saitama, Toyama, Shiga, Japan) ..... 169–178
Inhibition of DNA synthesis in primary cultures of adult rat hepatocytes by benzo[*a*]pyrene and related aromatic hydrocarbons: Role of Ah receptor-dependent events **(Benzo(*a*)pyrene metabolities may contribute to the toxic response)**
W. Zhao, K.S. Ramos (College Station, TX) ..... 179–189
Evaluation of the OECD 421 reproductive toxicity screening test protocol using butyl benzyl phthalate **(A high dose according to this protocol exhibits reproductive toxicity)**
A.H. Piersma, A. Verhoef, P.M. Dortant (Bilthoven, The Netherlands) ..... 191–197
Halogenated aromatic hydrocarbon-induced suppression of the plaque-forming cell response in B6C3F1 splenocytes cultured with allogenic mouse serum: Ah receptor structure activity relationships **(A good correlation between in vivo and in vitro activities of the tested compounds was found)**
N. Harper, M. Steinberg, J. Thomsen, S. Safe (College Station, TX) ..... 199–206

**Immunotoxicology**
Lymphotoxicity and myelotoxicity of doxorubicin and SDZ PSC 833 combined chemotherapies for normal mice **(Combination of doxorubicin and the chemosensitizer SDZ PSC 833 induced mild toxicity to lymphoid cells in normal mice)**
A. Pourtier-Manzanedo, A. Didier, S. Froidevaux, F. Loor (Strasbourg, France) ..... 207–217

**Toxicology Information and Resources**
Toxicology abstracts — an electronic journal on the Internet
R.A. Gardner (Bethesda, MD) ..... 219–228

Book reviews ..... 229–231
Contents of journals relating to Toxicology ..... 233–237
Author index ..... 239
Subject index ..... 241–244
Volume contents ..... 245–246
